SwimCloud

Coach Registration

The first step to running your team on Swimcloud is to claim your Swimcloud coaching profile.

Claim your profile here: www.swimcloud.com/register

***Swimcloud takes data security and integrity seriously.
You should use your official email address.***

***Swimcloud staff needs to verify that your email is
associated with your team before you are approved.***

SwimCloud

Free Team Pages

Swimcloud offers a robust set of free tools for swim teams to customize their presence on Swimcloud.

The **Manage** Button on your team's home page reveals access to tabs that you can customize.

Use the **ABOUT** tab to enter details about your team and to upload your team's logo and a banner image.

You can also have Swimcloud automatically track of your team's **RECORDS** and **FACILITIES** that you use.

Roster Management

Swimcloud allows coaches and teams to manage all aspects of their team roster.

The more accurate and complete your roster is, the easier and more efficient your meet entries will be!

Swimmers have access to manage their own profile on Swimcloud. Swimmers are able to be a member of multiple teams and coaches of those teams can have that swimmer on their roster - in essence sharing the swimmer's data.

SwimCloud

Roster Management

A screenshot of a web form titled "Add swimmer to active roster". The form has a "Clear form" link at the top left. It contains several input fields: "First Name" with the value "Kevin", "Last Name" with the value "Buck", and "Email" with the value "k@buck.com". A red circle highlights the "Last Name" field. Below the email field, there is a "Gender" section with radio buttons for "Male" (selected) and "Female". At the bottom right of the form, there are "Cancel" and "Create" buttons.

If a swimmer does not exist in our database, you can create a profile and add the swimmer to your roster. Add an email for the swimmer if you have one.

SwimCloud

Meet Entries

Using Swimcloud for your meet entries is incredibly easy and straightforward. You can use Swimcloud to:

- 1) Complete meet entries for a meet that is being run on Swimcloud's Meet Manager
- 2) Complete meet entries, and export a Hytek Meet Manager entry file to email to your meet host.

Meets need to be setup on Swimcloud first in order to do your entries. Oftentimes, a meet might already be on your schedule because the meet host added your team when they set up the meet.

Other times, you will need to create the meet in order to do your entries.

Run Your Meets

Run Your Meets On Swimcloud

Swimcloud can run your swim meets!

Existing swim meet management software is dated, expensive, and can be very intimidating for new users to learn.

Swimcloud's Meet Manager is very flexible and incredibly easy to operate. Swimcloud can connect to Colorado 5&6 as well as Superior Swim Timing Systems and read timing data and post it to the web.

You can also manually enter stopwatch times into Swimcloud for easy results and meet scoring.

Run Your Meets On Swimcloud

Here's what coach James Schuler of Huron Valley United in Michigan said about Swimcloud Meet Management Software:

“Everything worked great yesterday. I had a pair of my girls swimmers who had never run the colorado/meet manager before run it for my meet and it went just about as perfectly as we could have asked for.

All the separate events scored individually... we didn't have to do it manually which was great!

Keep up the good work!”
