

Dear NISCA Friends and Members,

The holiday season is rapidly approaching and we have so much to be thankful for this year.

Fort Lauderdale has started construction on our new 34 million dollar aquatic facility. The plan includes a 90 foot high diving tower establishing Fort Lauderdale as the first city in the western hemisphere to build such a structure. These upgrades - with new locker rooms - will reposition the International Swimming Hall of Fame as the center of the aquatic universe.

Your donation and renewed membership is vital to our growth and vision as we make plans to upgrade our museum. These upgrades could be as simple as a renovation of our existing buildings or the construction of an entirely new museum. We are looking at all options.

Now is the time for our members to help. Please donate to ensure the future of your International Swimming Hall of Fame.

2020 will mark the start of my third year leading ISHOF. I am optimistic that great things can happen with great support. If you would be more comfortable talking to me in person before you consider making a donation, I am happy to talk with every member of the Hall of Fame. Email me directly at Brent@ISHOF.org and I WILL find time to answer your email directly or call you personally.

Looking forward to a great 2020 for all!

Sincerely,

Brent T. Rutemiller

President and CEO of the International Swimming Hall of Fame

OUR SCOREBOARDS ARE BUILT TO LAST

Our very first scoreboard has been in continuous operation for 25 years and is still going strong. Can you say that about your scoreboard? IST Scoreboards are durable, affordable and repairable. Get a quote today and stop worrying about outrageous maintenance fees and replacing your board every 5-8 years.

SWIMWARE Alphanumeric Scoreboards

Alphanumeric Scoreboards are available in one line to 10 lane displays with 16 or 32 bright red LED characters per line. Use **MEETWARE^{®3}** or **TIMEWARE^{®3}** (with meet management software) for swimming or diving. Top line scrolls event name, number and heat number, then running clock. Lane lines show team code and name, then all 50 splits plus cumulative time. Diving shows team, name current score and place, DD's, judges' awards, score for the dive, new total score and current leading score. Also displays match date from **POLOWARE^{®3}**. **WORKWARE^{®3}** puts a different workout on each lane line. Use the scoreboard as a message center when not used for timing. Message function included with all IST Software saves virtually unlimited messages.

SWIMWARE Numeric Scoreboards

Numeric Scoreboards with one line to 10 lanes are a more affordable option that can be upgraded to alphanumeric. Driven by **MEETWARE^{®3}** or **TIMEWARE^{®3}** for swimming and diving events, numeric boards display a running clock on Lane 1 or on the optional scrolling message line. The remaining lanes show subtractive or cumulative splits—your choice! At the finish Lane, Place and Time are displayed. During diving events, you see the diver's rotation number and current score, the dive score and the new total. Numeric boards also display information from **POLOWARE^{®3}** and **WORKWARE^{®3}**. (The numeric scoreboard at right has an optional scrolling message line and team logo panel.) *All SWIMWARE Scoreboards have a protective lens and need just one 110volt GFI outlet. Indoor and outdoor scoreboards have a 5 year limited warranty*

International Sports Timing

International Sports Timing is the Official Timing System of

National Interscholastic Swimming Coaches Association

NISCA Coaches get a 15% discount on any timing system. Call for more details.

SWIMSTART[®]

SWIMSTART Electronic Start system includes a portable PA system, 360 degree strobe and tone start signals, all in a rugged aluminum case. **SWIMSTART** may be used stand-alone or with IST's **TIMEWARE[®]** or **MEETWARE[®]** Timing Systems. With its normally-open or normally-closed output, it also works with other timing consoles. **SWIMSTART's** Smart Charger means you don't have to run the battery down before recharging and you can't overcharge it. Also supports external far-side or block speakers.

SWIMCLOCK, SWIMCOUNT, SHOTCLOCK and SWIMSTART are covered by IST's 5 year limited warranty.

SWIMSTART[®] may be used stand-alone or interfaced to IST's Timing Systems or other popular timing consoles. No-tip feet allow the unit to be placed directly on the deck, or attach it to the back-stroke flag pole with latching straps included with the unit.

Our internal, rechargeable 12V battery has a smart charging circuit that makes it impossible to overcharge. No need to run the battery down before recharging, either. You can store the **SWIMSTART[®]** on the charger, so you always have a full charge. If you forget, you can even use it plugged in!

The forty watt speaker will get every swimmer's attention, since we bridge the power amps for maximum volume. Plug far-side or block speakers into the auxiliary jack for better sound coverage in large or outdoor pools. The ultra bright 360° strobe is protected by an ABS plastic lens. For practice, turn the speaker off and use the strobe only to train swimmers for the fastest possible start.

One low price includes the start, 40W speaker, wired microphone and mounting straps. No additional tripod to buy!
